

STC1600

STC1600 TRUCK CRANE
160 TONS LIFTING CAPACITY

Quality Changes the World

SANY

SANY Automobile Hoisting Machinery is one of the core business unit of Sany Heavy Industry, mainly engaged in the research and development of high end, mid to large tonnage crane series, including mobile crane, crawler crane, tower crane and loader crane. It has two industrial parks in Ningxiang and Huzhou, since entering the market, the products of Sany Automobile Hoisting Machinery have received worldwide recognition with advanced technology, lean manufacturing, high reliability and excellent service.

High-efficient and innovative chassis performance / chassis system

Newly creative 5-axle chassis is designed, with multiple braking brakes applied to ensure more reliable driving performance of chassis. Anti-tilting pre-warning technology is used, providing high stability and safety of the overall operation.

Safe and stable lifting performance / boom system

6-section boom is applied, with a total extended length of 63m, which leads the industry; fully optimized U-shaped large circular-section lifting boom of high-strength structural steel is used, to ensure more even stress and lighter weight, improving operation safety. The total jib length is 36m, claims the first in the industry; infinitely variable speed luffing is applied, with mounting angle of 0°, 20°, and 40°, to facilitate the change of operating condition, improving operation efficiency.

High-efficiency, energy-saving, and unique hydraulic control technology / hydraulic system

Self-developed dual pump converting / dividing main valve is used, with higher converting efficiency for single-action and good dividing controllability for combined-action of dual pump. Electro-proportional variable displacement piston pump is applied to ensure high-precision flow control, high efficiency and high energy-saving features.

Safe, stable, advanced and intelligent electronic control technology / electronic control system

Sany self-developed controller SYMC specially designed for engineering machinery, CAN bus full-digital network control technology and sufficient sensors are used, to ensure stable control signal, simple harness, and high reliability; timely data feedback facilitates the monitoring of the machine working state in real time; Load moment limiter equipping with comprehensive intelligent protective system is adopted, with accuracy controlled within $\pm 5\%$; comprehensive logic and interlock control is applied, to ensure more safe and reliable operation.

Superstructure **Cab**

- Sany self-developed cab in accordance with ergonomic design is used, with safety glass and corrosion-resistant steel plate, full-covering soften interior, super-large internal space, panoramic sunroof, and user-friendly adjustable seats; air conditioning and electric wiper are configured, to provide more comfortable and easy operation. Load moment limiter display is adopted for the systematic combination of main console and operation display system, which clearly show the data of all operating conditions for lifting operation.

 **Hydraulic System**

- Electro-proportional variable displacement piston pump is used to adjust the pump displacement in real time, achieving the high-precision flow control and greatly reducing energy loss;
- Innovative dual pump conversing and dividing main valves are used to easily achieve the stable control of single action and combined action under all operating conditions;
- Electric proportional variable motor is used for main winch, to ensure high operation efficiency; max. speed of single lines of main and auxiliary winches can be up to 135m/min;
- Closed slewing system is used, with free slipping function applied, to ensure stable rotation and control, and excellent inching operation.

 **Control system**

- CAN-bus instrument: CAN-bus instrument with a combined intelligent control electrical system is used for easy reading of the traveling parameters at any time. meanwhile, engine fault warning function is applied, to ensure convenient and fast troubleshooting;
- Outrigger automatic control system: Outrigger can be controlled electrically, with auto leveling control function configured for flexible and convenient operation.
- Comprehensive security protection system with 3-wraps protector, height limiter and angle limiter are configured for main and auxiliary winches, to prevent wire rope from over-hoisting and over-rolling out.
- Load moment limiter: High intelligent load moment limiter system is used, to fully protect lifting operation, providing accurate, stable and comfortable operation;
- Fault self-diagnosis system is used, to detect the failure of electrical and hydraulic devices of the superstructure, and engine and gearbox of the undercarriage. In case of failure of crane, guidance will be provided for troubleshooting to ensure reliable operation of the crane.

 **Luffing system**

- Deadweight lowering system is used with lowering compensation control applied. Lowering speed can be controlled for lifting of intermediate and long boom, to ensure lifting safety.
- Luffing angle is -0.5°~ 82°.

 **Telescopic boom**

- Single-cylinder pin technology is used, to achieve the pull-in and pull-out actions of the cylinder pin and boom pin through the electro-hydraulic control system;
- Telescopic action of the lifting boom can be applied through a single telescopic cylinder, with multi-stage pressure control applied. The use of multiple telescopic balance valves and mechanical and hydraulic interlock mechanism of cylinder pin and boom pin ensures safe and reliable operation of the telescopic system.
- 6-section boom made of high-strength welding structural steel, with U-shaped cross section applied. Length of basic boom is 13.55m, of fully-extended boom is 63m; jib length is 36m; lifting height of fully-extended boom is 63m; max. lifting height including jib is 99m.

 **Slewing system**

- 360° rotation is applied, with max. slewing speed of 1.6r/min; electro-proportional closed double-slewing system is used, to ensure good operation and more stable rotation.

Superstructure

Hoisting Mechanism

- Pump and motor dual variable speed regulation is applied, which is highly efficient and energy-saving. The perfect combination of winch balance valve and unique anti-slip hook technology is applied, to ensure stable lifting and lowering operation of the load.
- Normally-closed winch brake is used, with winch balance valve configured, to prevent stalling of the hook;
- Main hoist wire rope: Wire rope, 35Wx7-Φ22 280m; auxiliary hoist wire rope: Wire rope, 35Wx7-Φ22 210m;

Safety Device

- Load Moment Limiter: Coordinate system is introduced to establish a simple and accurate model to measure the lifting load, improving the integrated precision of load moment limiter system. The use of on-line empty-load calibration can solve the inaccurate problem of lifting load due to deviation of dimensional parameters of lifting boom, thus improving the system accuracy, with accuracy of load moment limiter system up to ±5%.
- Hydraulic system is configured with hydraulic balance valve, relief valve, and two-way hydraulic lock etc., achieving stable and reliable operation of hydraulic system;
- Main and auxiliary winches are equipped with 3-wrap protector, to prevent wire rope from over-rolling out;
- Boom and jib are configured with height limiter, to prevent wire rope from over-hoisting;
- Anemometer is equipped at boom end, to detect whether the high-altitude wind speed exceeds the available operating range.
- Length and angle sensors and pressure sensor are configured, to display the operation state of the crane in real time and to cut off the dangerous action automatically, with an alarm given from the buzzer.

Counterweight

- 60t movable counterweight
- There are Six-counterweight combination of 10t, 19t, 28t, 37t, 46t, and 60t, to ensure fast and convenient installation;
- Slewing radius is 4910mm.

Undercarriage

Cab

- Sany self-developed new steel cab is used, featuring with good shock resistance and sealing, with both side open door, mechanical suspension driving seat, adjustable steering wheel, large-vision rearview mirror, comfort driver's seat with headrest, fog fan, air conditioning, and stereo radio equipped, and a complete set of control instrument and meters to ensure more comfortable and safe operation.

Frame

- It is of a Sany self-designed and manufactured box-type structure welded by high-strength steel plate, featuring with lighter weight and greater bearing capacity, with flexural strength increased by 46.8% and torsional strength increased by 68% compared to the original structure.

Axles

- Third, forth, and fifth axles are as drive shaft and first, second, and fifth axles are as steering shaft; third and forth axles are equipped with axial and inter-wheel differential inside, and fifth axle is equipped with inter-wheel differentia; welding-type axle housing is used, to provide bearing capacity.

Undercarriage

Outrigger

- Arrangement of front-swing outrigger and rear telescopic outriggers is applied. They are made of high-strength steel plate, which are controlled by control panel, featuring with automatically leveling function, to ensure flexible operation. Four-point support is applied, with longitudinal and horizontal spans of 7.8mx8.0m applied, to ensure easy operation and high stability.

Transmission System

- Gearbox: Manual / Auto gearbox is used, with twelve forward gears and two reverse gears, to provide a large speed ratio range, which can not only meet the requirement of climbing at low speed but also travel at high speed, with automatic cruise function.
- Drive shaft: Optimized arrangement of drive shaft is applied, to ensure stable and reliable transmission of drive shaft. For most optimized power transmission, end tooth coupling shaft is used, to provide larger transmission torque.

Braking System

- Braking system includes traveling brake, parking brake, emergency brake, and auxiliary brake.
- Traveling brake adopts double-circuit braking system, with air servo brakes and drum brakes used for all wheels.
- Parking brake will be acted on the third to fifth axle through spring air chamber;
- For emergency brake, air supply shall be cut off by stored energy of spring for emergency stop;
- Auxiliary brake consists of engine brake and exhaust brake, with dual brake applied for engine, to ensure traveling safety and reliability.

Suspension System

- All axle suspensions adopt plate spring suspension systems; plate spring has been passed more than 100,000 times fatigue tests, with performance parameters of front and rear pale springs optimized, to ensure strength and comfort riding.

Steering System

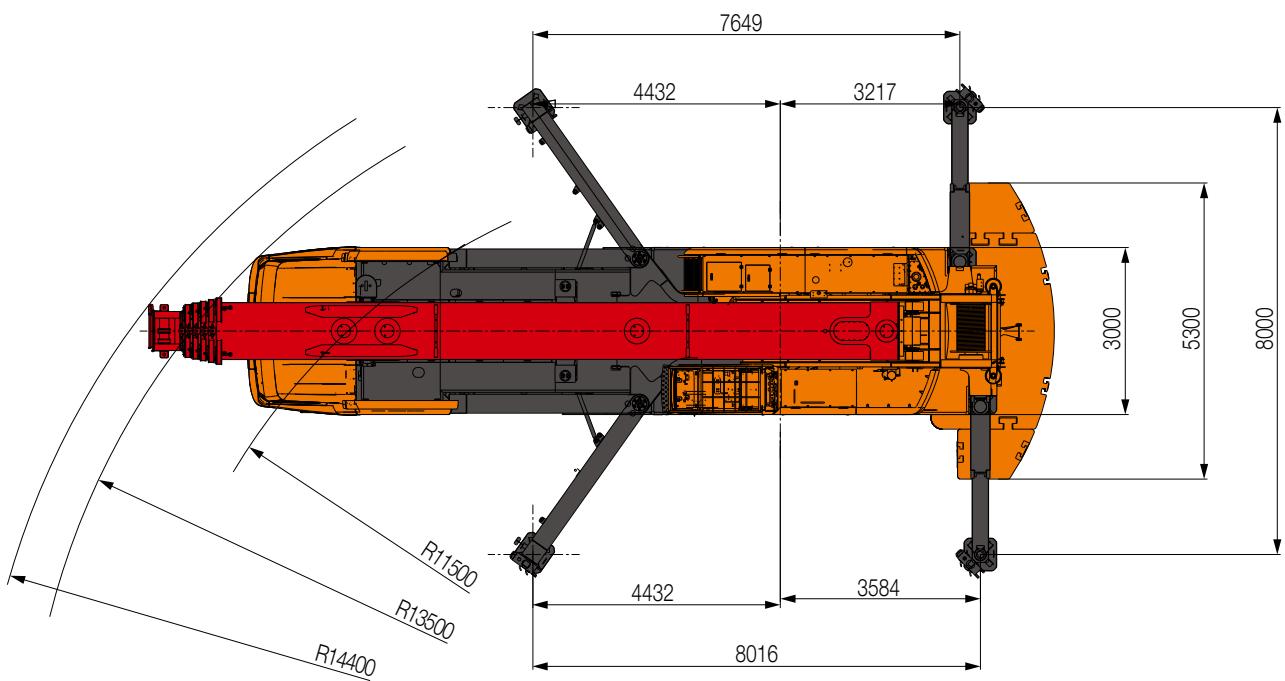

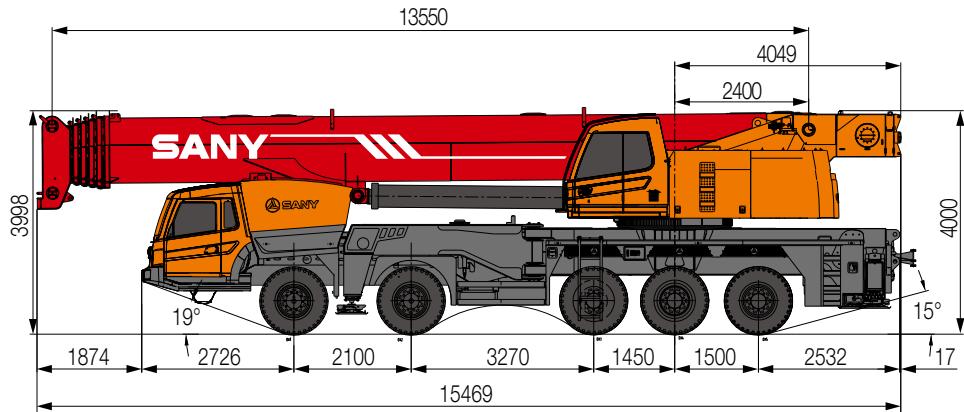

- Single-circuit hydraulic power steering system equipping with mechanical steering limit is used, and emergency steering device having emergency pump drive is equipped.

Tires

- 12.00R24-20PR /14.00R20-20PR

Electrical system

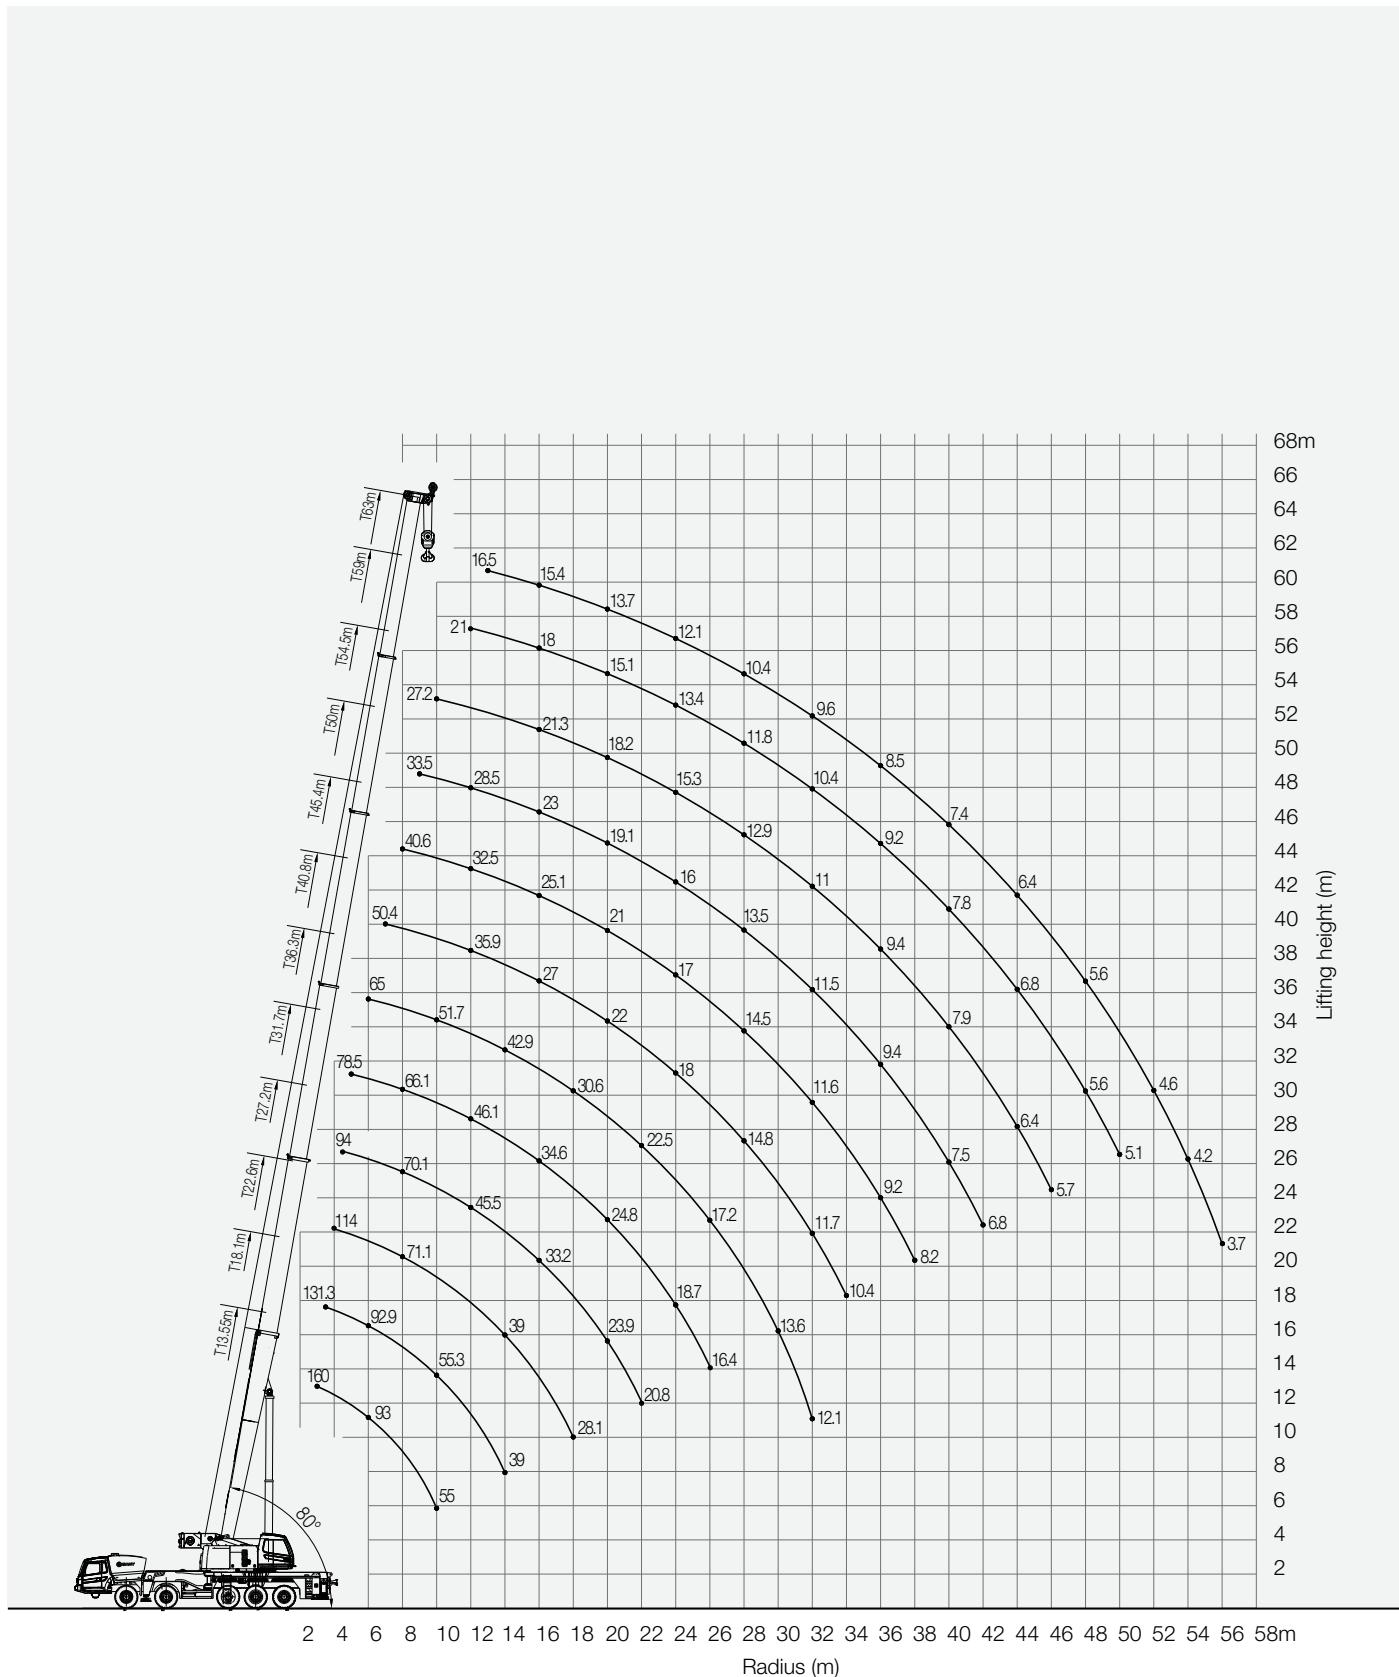

- 2 × 12V maintenance-free batteries are used, with mechanical power master switch configured, to manually cut off the machine power; bus control system is used, to achieve information interaction between superstructure and undercarriage.

TECHNICAL PARAMETER**

Type	Item	Parameter
Capacity	Max. lifting capacity	160t
Dimensions	Overall length	15469 mm
	Overall width	3000 mm
	Overall height	4000 mm
	Axle-1,2	2100 mm
	Axle-2,3	3270 mm
	Axle-3,4	1450 mm
	Axle-4,5	1500 mm
Weight	Overall weight	55000 kg
	Axle load	10000/10000 kg
	Axle load-3,4,5	13000/13000/9000 kg
Traveling	Max.traveling speed	80 km/h
	Turning radius	Min.turning radius 11.5 m Min.turning radius of boom head 14.4 m
	Wheel formula	10×6 ×6
	Min.ground clearance	310 mm
	approach angle	19 °
	Departure angle	15 °
	Max.gradeability	40%
	Fuel consumption per 100km	≤ 78 L
	Temperature range	- 0.5 °C ~+ 82 °C
	Min.rated range	3 m
Main Performance Data	Tail slewing radius of swingtable	4.91m
	Boom section	6
	boom shape	U-shaped
	Max.lifting moment	Base boom 6000 kN·m
		Full-extend boom 3042 kN·m
		Full-extend boom+jib 1827kN·m
	Boom length	Base boom 13.55 m
		Full-extend boom 63 m
		Full-extend boom+jib 99 m
	Outrigger span (Longitudinal×Transversal)	7.8 × 8.0 m
	Jib offset	0 °, 20 °, 40 °
	Max.single rope lifting speed of main winch (no load)	135 m/min
	Max.single rope lifting speed of auxiliary winch (no load)	135 m/min
Working speed	Full extension/retraction time of boom	500 / s
	Full lifting/descending time of boom	60 /s
	Slewing speed	1.6 r/min
	Superstructure	Cooling/Heating
	Chassis	Cooling/Heating

STC1600 Working Ranges

**STC1600 TRUCK CRANE
LOAD CHART**
Prerequisites:

- ① Boom operation conditions (fully extended boom length), min length is 13.55m and max. length is 63m.
- ② The span of outriggers is 7.8x8.0m.
- ③ 360° working condition is applied.
- ④ Counterweight is 60T.

Radius (m)	Main boom (m)													Radius (m)
	13.55	18.1	18.1	18.1	22.6	22.6	22.6	27.2	27.2	27.2	31.7	31.7	36.3

Prerequisites:

- ① Boom operation conditions (fully extended boom length), min length is 13.55m and max. length is 63m.
- ② The span of outriggers is 7.8x8.0m.
- ③ 360° working condition is applied.
- ④ Counterweight is 46T.

**STC1600 TRUCK CRANE
LOAD CHART**
Prerequisites:

- ① Boom operation conditions (fully extended boom length), min length is 13.55m and max. length is 63m.
- ② The span of outriggers is 7.8x8.0m.
- ③ 360° working condition is applied.
- ④ Counterweight is 19T.

**STC1600 TRUCK CRANE
LOAD CHART**
Prerequisites:

- ① Boom operation conditions (fully extended boom length), min length is 13.55m and max. length is 63m.
- ② The span of outriggers is 7.8x8.0m.
- ③ 360° working condition is applied.
- ④ Counterweight is OT.

Prerequisites:

- ① Boom operation conditions (fully extended boom length), min length is 13.55m and max. length is 63m.
- ② The span of outriggers is 8.8m×5.5m.
- ③ 360° working condition is applied.
- ④ Counterweight is 46T.

**STC1600 TRUCK CRANE
LOAD CHART**
Prerequisites:

- ① Boom operation conditions (fully extended boom length), min length is 13.55m and max. length is 63m.
- ② The span of outriggers is 8.8m×5.5m.
- ③ 360° working condition is applied.
- ④ Counterweight is 19T.

STC1600 Working Ranges

Prerequisites:

- ① Boom operation conditions (fully extended boom + jib), max. length is 63 + 12.2m.
- ② The span of outriggers is 7.8x8.0m.
- ③ 360° working conditions are applied.
- ④ Counterweight is 60T.
- ⑤ Jib offset of 0°, 20°, 40°.

STC1600 TRUCK CRANE WHEEL CRANE FAMILY MAP

■ TRUCK CRANE

				
STC200 Maximum Load Capacity: 20t Telescopic Boom: 4 Sections, 10.6-33m	STC250 Maximum Load Capacity: 25t Telescopic Boom: 4 Sections, 10.6-33.5m	STC250H Maximum Load Capacity: 25t Telescopic Boom: 5 Sections, 10.5-39.5m	STC300S Maximum Load Capacity: 30t Telescopic Boom: 5 Sections, 10.6-40.5m	STC300TH Maximum Load Capacity: 30t Telescopic Boom: 4 Sections, 10.6-33.0m
				
STC300H Maximum Load Capacity: 30t Telescopic Boom: 5 Sections, 10.5-39.5m	STC500 Maximum Load Capacity: 50t Telescopic Boom: 5 Sections, 11.5-43m	STC550 Maximum Load Capacity: 55t Telescopic Boom: 5 Sections, 11.5-43m	STC600S Maximum Load Capacity: 60t Telescopic Boom: 5 Sections, 11.0-43.5m	STC750 Maximum Load Capacity: 75t Telescopic Boom: 5 Sections, 11.0-45m
				
STC800S Maximum Load Capacity: 80t Telescopic Boom: 5 Sections, 12.2-47m	STC1000 Maximum Load Capacity: 100t Telescopic Boom: 5 Sections, 13.5-52m	STC1000C Maximum Load Capacity: 100t Telescopic Boom: 6 Sections, 13.25-60m	STC1000S Maximum Load Capacity: 100t Telescopic Boom: 5 Sections, 12.28-56m	STC1200S Maximum Load Capacity: 120t Telescopic Boom: 7 Sections, 12.6-63.5m
				
STC1300C Maximum Load Capacity: 130t Telescopic Boom: 6 Sections, 13.3-60m	STC1600 Maximum Load Capacity: 160t Telescopic Boom: 6 Sections, 13.4-62m	STC2200 Maximum Load Capacity: 220t Telescopic Boom: 6 Sections, 14.55-68m		

■ ALL TERRAIN CRANE

			
SAC1800 Maximum Load Capacity: 180t Telescopic Boom: 6 Sections, 13.5-62m	SAC2200 Maximum Load Capacity: 220t Telescopic Boom: 6 Sections, 13.5-62m	SAC2600 Maximum Load Capacity: 260t Telescopic Boom: 6 Sections, 15.65-73m	SAC3000 Maximum Load Capacity: 300t Telescopic Boom: 7 Sections, 15.4-80m
			
SAC3500 Maximum Load Capacity: 350t Telescopic Boom: 4 Sections, 15.2-70m	SAC6000 Maximum Load Capacity: 600t Telescopic Boom: 7 Sections, 17.1-80m		

■ ROUGH-TERRAIN CRANE

				
SRC250 Maximum Load Capacity: 25t Telescopic Boom: 4 Sections, 9.9-31.5m	SRC350 Maximum Load Capacity: 35t Telescopic Boom: 4 Sections, 10-31.5m	SRC550 Maximum Load Capacity: 55t Telescopic Boom: 4 Sections, 11.25-34.5m	SRC660H Maximum Load Capacity: 66t Telescopic Boom: 5 Sections, 11.5-43m	SRC750 Maximum Load Capacity: 75t Telescopic Boom: 5 Sections, 11.0-45m
				
SRC1200 Maximum Load Capacity: 120t Telescopic Boom: 5 Sections, 13-48m				

Quality Changes the World

SANY AUTOMOBILE HOISTING MACHINERY

Address: SANY Industrial Park, Jinzhou Development Zone,
Changsha, Hunan, China.

Service Hotline: 4006098318

Email: crd@sany.com.cn

For more information, please visit: www.sanygroup.com

For our consistent improvement in technology, specifications may change without notice.
The machines illustrated may show optional equipment which can be supplied at additional cost.
